Local IT company celebrates first 10 years, counts successes

UptimeLV, Inc. built relationships, grew, even in a down economy

LAS VEGAS – The celebration of 10 years in business is a milestone no matter the economic environment. UptimeLV is one company that grew, even in a down economy. This makes the celebration of the company’s 10th anniversary especially sweet.

Established in 2001, UptimeLV, Inc. is a Las Vegas-based IT company that specializes in network and computer sales, installation, system design, consulting and maintenance.

In the last decade, UptimeLV, Inc.’s accomplishments have served it well. It was the first IT company in Nevada to be recognized as a Gold Certified Partner by Microsoft with designated competencies in network infrastructure, advanced infrastructure and security solutions. In 2006, the Las Vegas Chamber of Commerce named UptimeLV “Innovative Business of the Year.” Dave Rounds, company co-founder, was an integral in the building of the network infrastructure from the ground up for Three Square, the Las Vegas-based organization whose mission is to end hunger in Southern Nevada.

“Ten years ago I saw an opportunity to get Las Vegas out of the technology dark ages by educating small business owners and in turn helping them serve their own customers better,” said Rounds. “And today the dream continues as we grow.”

UptimeLV has served more than 600 businesses and saved clients up to 30 percent annually on their IT services. To continue that growth, UptimeLV joined forces last year with Radical Networks, Inc. (RNI) to create one larger, stronger firm operating under the name, UptimeLV. On their own, the companies were two of the largest, most credible and successful IT companies in Southern Nevada. As one larger, stronger firm, UptimeLV has since become Nevada’s premier IT resource.
